

## New Software Release ADS233 - Suzuki® 2016

January 2017

Advanced Diagnostics is pleased to announce the release of Suzuki® 2016 (ADS233) key programming software for a range of Suzuki® vehicles worldwide from 2010 onwards.

### What does the software do?

ADS233 will program bladed and proximity keys for various models of Suzuki® cars. A pincode is required to program keys and the software will bypass the pincode during the procedure when the Smart Dongle is used. ADS192 has been significantly enhanced and now supports various older model Suzuki® vehicles for pincode reading.

Please see application list below for vehicle coverage or Info Quest.

**MVP Pro users: one token will be deducted for key programming.**

### What other software and products will I need?

Pro Tester

US Patent Number 7,315,238 B2

Smart Dongle

ADS192 Suzuki® 2012 Software

Contact your distributor to purchase ADS233 now.

#### OFFER DETAILS

Cable	ADC250 or ADC251
Dongle	Smart Dongle
Software Category	C
Other Software Required	ADS192 (enhanced and updated)
