

FEATURED EXHIBITOR

ConnectWise

Booth #710

Building and managing a successful physical security business with disjointed systems is challenging. ConnectWise pulls traditionally disjointed systems into a single platform to enable a 360-degree view of a security business. Connect your business with ConnectWise Sell, a quote and proposal solution that simplifies and speeds up sales processes; or ConnectWise Manage, a business management solution that unifies all aspects of your operations. The software covers time management, quoting and sales to project management, purchasing and billing. Request more info at www.SecurityInfoWatch.com/12305863

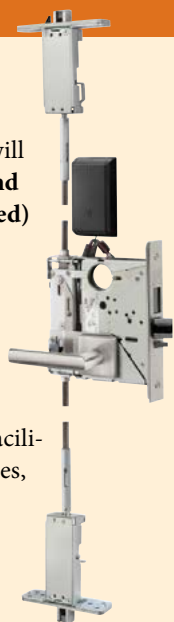

FEATURED EXHIBITOR

ASSA ABLOY

Booth #3203

Among other products, ASSA ABLOY will showcase the **Sargent FM7300 Series** and **Corbin Russwin FE6600 Series** (pictured) tornado-compliant, multi-point locks (more info at www.securityinfowatch.com/12360638), which are engineered to withstand severe wind speeds and flying debris. These locks can be deployed to protect community shelters, safe rooms, corporate and educational facilities, healthcare and government campuses, 911 call stations, emergency operation centers, fire and rescue, police stations, and other public and first-responder facilities. Additionally, the **Securitron M680E series with EcoMag technology** (more info at www.securityinfowatch.com/12360649) delivers the same unsurpassed intelligence, style and convenience as the previous M680 series, but with an increased holding force of 1,200 lbs and up to 80-percent reduction in energy consumption. The company will also display **HES 1500/1600 Series Electric Strikes** (more info at www.securityinfowatch.com/12303432). Request more info at www.SecurityInfoWatch.com/12360656

FEATURED EXHIBITOR

Dahua Technology

Booth #4145

Dahua Technology's new 2MP network Artificial Intelligence (AI) box camera offers advanced Deep Learning technology, which includes traffic data collection, facial analysis, and heat mapping. The camera also features Starlight Technology, Dahua's ultra-low-light technology, which allows the camera to deliver details in dark environments down to 0.001 lux. The camera adapts to the ONVIF and PSIA specifications, ensuring interoperability between network video products regardless of manufacturer. Additional features include true WDR (120dB) and day/night IR cut filter, 1080p (1920 x 1080) at 60 fps, and H.265 compression. Request more info at www.SecurityInfoWatch.com/12360667

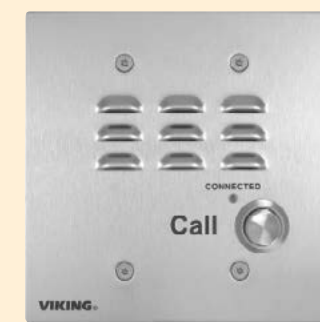

FEATURED EXHIBITOR

Viking Electronics

Booth #2022

The E-32 from Viking Electronics is a vandal-resistant single-button call box that provides hands-free, two-way communication for a variety of residential security and commercial applications. Features include a heavy-duty stainless steel faceplate, small 5x5-inch footprint and double gang box mounting. When the button is pressed, it cycles through five pre-programmed phone numbers. Programming can be done remotely or locally, and the unit is available in either analog or VoIP interface. Request more info at www.SecurityInfoWatch.com/12361136

Access Specialties Intl.

Booth #1943

Focal Point Freedom is a new mobile application for the Focal Point IP-based access control system from Access Specialties Intl. It gives customers the option to remotely control their doors, see transaction activity that they are authorized to view, and disable card holder and operator permissions.

Request more info at www.SecurityInfoWatch.com/12306266

Aiphone

Booth #1321

Aiphone Corp. has upgraded its GT Series multi-tenant video intercom to include hassle-free, quick system programming and staff communication between multiple buildings. Dealers and/or building management can remotely update tenant directories using a logical network. Tenant names and dialing numbers can be updated with an NFC-equipped Android phone or tablet. Request more info at www.SecurityInfoWatch.com/12244730

Altronix

Booth #2823

Altronix's NetWaySP8WPX Hardened PoE Switch with Dual SFP (Fiber) Ports is designed for long-distance applications. The all-in-one solution includes an 8-port hardened PoE switch, 115W power supply/charger, and two SFP ports. Each port is rated at 30W (PoE/PoE+), with two ports configurable for 60W (Hi-PoE). It includes LINQ Network Communications Technology. Request more info at www.SecurityInfoWatch.com/12361109

Alvarado

Booth #4433

Alvarado's SU5000 optical turnstile combines secure, bi-directional entry control in an architecturally inspired design. With a slim cabinet and a variety of aesthetic options such as illuminated panels, logo etched panels and variable barrier heights, it integrates with any access control or visitor management system and accommodates an array of credential readers. Request more info at www.SecurityInfoWatch.com/10217502

Apollo Security

Booth #3033

The Apollo Security ASP-4 four-reader high-speed network controller supports large systems with redundant high-security requirements. One million cards are supported per controller, and 10,000 cards can be downloaded in one second. Up to 32 of the units can be configured in a cluster (128 readers) to support anti-passback areas. Request more info at www.SecurityInfoWatch.com/12306538

Arecont Vision

Booth #3221

Arecont Vision's MegaDome G3 RS third generation multi-megapixel cameras are easy to install and manage with "no-touch" remote setup. Install the magnetic mounting plate, connect the PoE (Power-over-Ethernet) IP cable, magnetically snap in place and fasten the camera to the mounting plate, and then remotely configure the camera. Request more info at www.SecurityInfoWatch.com/12360783

Automatic Systems

Booth #4461

The new TRS370P full-height turnstile with clear acrylic rotor arms from Automatic Systems is architecturally designed with clear acrylic mobile obstacles, suitable for an

interior lobby environment where aesthetics are equally as important as function and durability. Throughput is between 15 and 20 passages per minute.

Request more info at www.SecurityInfoWatch.com/12360674

Axis Communications

Booth #4032

Axis Communications will introduce the AXIS D2050-VE Network Radar Detector – an outdoor motion detector with radar technology that can provide cost-efficient perimeter protection, accurate and reliable day and night detection and can also decrease false alarms. The radar detector is powered by PoE and has IP66, IK108 and NEMA 4X ratings for tough environments. Request more info at www.SecurityInfoWatch.com/12361134

Boon Edam

Booth #4003

Boon Edam Inc. will display a new access control pedestal that can be attached to the recently-launched Lifeline Swing optical turnstile, a swinging barrier lobby security solution for Class A buildings. The pedestal incorporates MorphoWave touchless fingerprint technology from OT-Morpho, ideal for high-throughput applications. Request more info at www.SecurityInfoWatch.com/12360773

FEATURED EXHIBITOR

Hikvision

Booth #3703

Hikvision will feature the DeepinMind NVR (top photo), which includes a high-speed GPU that processes video data at tremendous speed to isolate detection of human subjects, significantly improving video analysis accuracy and therefore reliability. Deep Learning-based analysis is utilized to recognize human body targets. Other features include: up to 32 IP camera inputs, H.265+ compression technology, up to 12MP camera input resolution and 4K HDMI output, and up to 64TB on-board storage. Hikvision will also feature the TurboHD 3.0 DS-7200HUHI-Fx/N DVR series (middle photo) and the DarkfighterX PTZ DF8225IH (bottom photo).

Request more info at www.SecurityInfoWatch.com/12360334

Bosch Security Systems

Booth #3333

Bosch FLEXIDOME IP 4000i and IP 5000i cameras offer resolutions up to 5MP and built-in Essential Video Analytics as standard. This means quick retrieval of valuable data from hours of stored video and alerts when needed to improve security. Beyond security, video data can help users make more informed business decisions.

Request more info at www.SecurityInfoWatch.com/12360788

Cast Lighting

Booth #4384

CAST Perimeter Security Lighting introduces the Generation 3 series of fence-mounted, low-voltage LED fixtures, now available with extended coverage and precision optics. Attaching low-voltage lights directly to a fence allows

security professionals to add lighting to any project at a fraction of the labor and material costs compared to street lights.

Request more info at www.SecurityInfoWatch.com/10732297

CBC Americas/Ganz Security

Booth #2748

CBC Americas Corp. will demo the CrucialTrak touchless Biometric Access Control System (BACS) and high-speed gates. The BACS features up to four independent biometrics

FEATURED EXHIBITOR

DoorKing

Booth #2520

DoorKing's DKS long range card reader system includes many advanced features that make it an ideal choice for AVI (Automatic Vehicle Identification) applications or in any application where longer read ranges, up to 25 feet, are required. The unit uses passive card technology, which means that the card/tag does not contain a battery, so they never wear out. All necessary settings and adjustments can be made using DIP and rotary switches on the card reader control board - an easy way to set up the reader system.

Request more info at www.SecurityInfoWatch.com/12303307

in one - fingerprint, iris, facial and palm vein, and includes touchless biometric readers and sliding, swing and robo-arm speed gates. It won best new product in show at ISC West 2017.

Request more info at www.SecurityInfoWatch.com/12306309

Comm Port Technologies

Booth #4377

The Comm Port CPAS under vehicle surveillance systems (UVSS) are ideal for secure vehicle entry points at government, military and corporate facilities. They offer high resolution color composite scanning up to 900 fps for vehicles traveling up to 75 mph. Analysts can view the entire length of a vehicle without an image-processing computer or control unit.

Request more info at www.SecurityInfoWatch.com/12360800

ComNet

Booth #1509

ComNet will display Port Guardian, a new cybersecurity feature in its self-managed switches that has the capability to physically disconnect a port if unauthorized access is detected. When network access is attempted by disconnecting an IP addressable device on the edge, an SNMP notification is sent to the head end and the effected port is physically locked out.

Request more info at www.SecurityInfoWatch.com/12361100

Data Management Inc. Booth #2143

One Day Time-Expiring Visitor Badges change color overnight to prevent visitors from re-using them to re-enter a facility without proper authorization. The badges show a pink "VOID" image that can be recognized from a distance. They are available in books for signing in by hand or on printer rolls.

Request more info at www.SecurityInfoWatch.com/12248582

Dedrone

Booth #647

DroneTracker from Dedrone detects civilian drones. Its optimized, multi-sensor hardware can be mounted to facades or windows, and identifies approaching drones by means of

visual, acoustic and frequency sensors. Correlation and analysis of this information reliably classifies approaching drones, and triggers alarms to alert security staff.

Request more info at www.SecurityInfoWatch.com/12360753

Delta Turnstiles

Booth #3869

Delta Turnstiles' Infinity, the first of its new Designer Series turnstiles, will debut at ASIS. The turnstiles are very design-oriented. Their circular shape make them especially distinctive, and add an aesthetic dimension to any space. The Infinity model utilizes bi-directional optical technology and features the additional deterrence of swinging glass/acrylic barriers.

Request more info at www.SecurityInfoWatch.com/12352982

Detex

Booth #2723

Detex electrified lockdown systems enable the locking down of external doors quickly with the push of a button, saving critical minutes. Making sure unauthorized people

do not gain entry, controlling access within the building, and allowing easy exit in an emergency are all accomplished rapidly with central control.

Request more info at www.SecurityInfoWatch.com/12167961

Dice Corp.

Booth #525

Matrix Universal Video from DICE is an event management system that simultaneously delivers alarms and their corresponding videos to central station operators with one streamlined system. The browser-based system allows operators to access alarms, customer relationship management tools and live video feeds on two side-by-side screens.

Request more info at www.SecurityInfoWatch.com/10453479

DITEK Corp.

Booth #701

DITEK's DTK-UPS Series combines robust

surge protection with online double conversion technology to enable equipment to survive even the harshest power quality issues. Features include zero transfer time between AC and battery, intuitive LCD display, easy-to-use software for remote monitoring, USB and Ethernet compatibility, and auto shutdown when a battery is depleted.

Request more info at www.SecurityInfoWatch.com/12361117

dormakaba

Booth #2321

dormakaba will showcase the following products in booth 2321 at ASIS 2017:

Full Height Turnstiles and Gates especially suitable for securing the perimeter of buildings and property; **Keyscan mobile access control** for iOS or Android devices can store mobile credentials in an app; the **RCI 910TC** enables a simple wave of a hand to activate automatic doors; the **E-Plex 7900 RF** wireless lock features a new design with advanced functionality; and the **BEST Shelter 9KX** responsive lockdown solution quickly creates safe spaces within a facility.

Request more info at www.SecurityInfoWatch.com/12360327

Dortronics

Booth #1925

The Dortronics 4800 Series smart interlock controller can be user-configured to accommodate up to five doors with ample flexibility for various input/output configurations. It features 12 field-assignable inputs and 17 configurable relay outputs for maximum flexibility. A watchdog circuit constantly monitors operation and LED indicators display input/output connection status.

Product Preview: ASIS 2017

New Security Products Straight from the Show Floor

Everbridge

Booth #1101

Everbridge Safety Connection, featuring new Private Incident Zones geo-fence capability, helps businesses and organizations quickly locate and communicate with their people even when they are traveling or moving between buildings and campuses in proximity of a threat. Notifications can be sent over multiple modalities to ensure the employee receives the message.

Request more info at www.SecurityInfoWatch.com/12191072

Galaxy Control Systems

Booth #2241

The Galaxy Cloud Concierge solution is a turnkey, cloud-based, fully hosted and managed access control and monitoring solution

that includes professional 24/7 management and supports industry standard access technologies. It comes in three configurations: an on-site, user-managed, cloud-based system; a remote cloud-based, user-managed integrated system; or a remote cloud-based, reseller/integrator managed integrated system.

Request more info at www.SecurityInfoWatch.com/12321919

Genetec

Booth #3147

At ASIS, Genetec will announce the expansion of its Streamvault (SV) turnkey security infrastructure portfolio, which includes enterprise-grade servers, workstations and storage solutions. This will complement the company's existing portfolio of compact appliances and will be available with Security Center pre-installed and validated performance.

Request more info at www.SecurityInfoWatch.com/12361178

Geutebrück

Booth 3956

Geutebrück's G-Health Monitoring software monitors the operating parameters a video security system and provides automatic notification of critical states, including all recording functions, from camera configuration to the data throughput of the recording. The software can manage up to 1,000 NVRs and send fault messages via e-mail or as an alarm in the web interface.

New Security Products Straight from the Show Floor

Hanwha Techwin America

Booth #3523

Hanwha Techwin America's Wisenet P series multi-sensor/multi-directional cameras are ideal for applications such as parking lots, shopping mall entrances and airports. It includes the PNM-9080VQ with four individual 2MP sensors for a total of 8MP resolution capable of 150dB WDR and 60fps (per sensor); and the PNM-9081VQ with four individual 5MP sensors that deliver 20MP resolution.

Request more info at www.SecurityInfoWatch.com/12358128

HID Global

Booth #3009

HID Location Services helps organizations leverage a single access control credential to employ workplace Optimization capabilities for real-time location awareness and analysis of employees. This enables analyzing building and room usage to optimize building management and operational efficiency. The proximity-based services are powered by IoT, BLE, WiFi and cloud-based technologies.

Request more info at www.SecurityInfoWatch.com/12346299

Honeywell Security & Fire

Booth #2509

Honeywell expands its Connected Building platform with ProWatch 4.3.5, which combines access control, video surveillance, intrusion detection and other functions. The latest update includes increased mobility on iOS and Android providing access, door control and badge identification remotely. Open integration to third-party systems provides added value and choices.

Request more info at www.SecurityInfoWatch.com/12360689

IDIS

Booth #3846

The IDIS 12/5 MP Super Fisheye (model DC-Y3C14WRX) delivers 360° HD surveillance, with clear identification from center to edge and wall to wall. Built-in IR LEDs ensure nearly 50-ft night visibility, with support for true WDR up to 120dB.

It offers camera-side and client-side dewarping (including on smartphones), along with two-way communication and the IDIS Intelligent Codec.

Request more info at www.SecurityInfoWatch.com/12360240

IndigoVision

Booth #1023

IndigoVision's CyberVigilant is a VMS-integrated network monitoring device designed to monitor and detect network cybersecurity anomalies for surveillance devices.

It detects and reports illegal configuration access attempts, network reconnaissance, device access from unauthorized clients, shell access, use of unauthorized DNS and NTP servers, and Denial Of Service (DOS) attacks.

Request more info at www.SecurityInfoWatch.com/12360679

iView Systems
Booth #1601

iTrak from iView Systems is a unified software platform for Incident, Risk Management, Visitor Management and Identification solutions, ensuring reporting and compliance against a wide range of requirements. iTrak delivers an easy to use physical security daily reporting system, optionally supporting CLERY, Occupational Health and Safety and other specific industry requirements.

Request more info at www.SecurityInfoWatch.com/12360572

Johnson Controls Security Products
Booth #4119

Johnson Controls will feature the following products from its Tyco Security Products portfolio: The DSC iotega security and lifestyle management hub (pictured); exacqVision 8.6 VMS; American Dynamics victor VideoEdge 5.0 VMS; Illustra Flex 3MP cameras; Kantech EntraPass Go Pass Mobile access control App with Apple Watch Support; and the Software House iSTAR Ultra LT door controller.

Request more info at www.SecurityInfoWatch.com/12360791

KBC Networks
Booth #1909

KBC Networks will feature its

ThruLink products, which enable real-time, encrypted video, audio and data to be transmitted over public networks such as the internet or 3G/4G/LTE. Already in use by police, transportation, banking and other organizations, the secure, hardware VPN device takes advantage of public infrastructure while maintaining signal security.

Request more info at www.SecurityInfoWatch.com/12306021

LifeSafety Power
Booth #1341

LifeSafety Power will display the next-generation FlexPower Multi-Site

Manager (MSM-Enterprise), with the ability to manage an unlimited number of power-connected systems across the enterprise and extract comprehensive information, producing charts, graphs and other critical data for proactive site management and maintenance.

Request more info at www.SecurityInfoWatch.com/12360227

Louroe Electronics
Booth #3243

The AOP530 from Louroe Electronics is a two-way speaker microphone with echo cancellation and full-duplex communication with DSP technology. It features a two-inch speaker for bi-directional audio. Its vandal-resistant, stainless steel faceplate fits into any three-gang electrical box. The product connects directly to IP cameras, encoders and devices that support two-way audio.

Request more info at www.SecurityInfoWatch.com/12361129

March Networks
Booth #4522

March Networks Searchlight for QSR powered by 360iQ is a cloud-based video and retail data analytics service for the quick service restaurant (QSR) market. It provides insights into sales and productivity numbers, best-selling products, labor reports and other operational data as well as loss prevention reports with integrated POS transaction data and HD video.

Request more info at www.SecurityInfoWatch.com/10918699

Milestone Systems
Booth #3945

Milestone Systems XProtect 2017 R2 includes XProtect Essential+; XProtect Express+ and XProtect Professional+.

It includes security enhancements for improved cybersecurity, including securing the video recordings using strong encryption. The integrity of the recordings is ensured by digitally signing using SHA-2 (Secure Hash Algorithm 2), an important security standard.

New Security Products Straight from the Show Floor

Princeton Identity

Booth #2847

The IOM Access200 by Princeton Identity processes identification with a quick glance at any point of entrance. The unit features multi-modal (face and iris) and multi-factor capabilities (PIN and card) utilizing the company's Iris on the Move technology and provides flexibility for various access control applications.

Request more info at www.SecurityInfoWatch.com/12360726

PROTECH (Protection Technologies Inc.)

Booth #1100

PROTECH will launch the Piramid Connect dual technology motion detection sensor at ASIS. It features digital doppler pulsed radar and range cut-off which, when combined with advance target speed analysis and random moving object rejection, enhances its false-alarm-free performance. Alarm centralization technology allows it to connect to PROTECH's Maxibus head-end.

Request more info at www.SecurityInfoWatch.com/12360785

Proxim Wireless

Booth #4376

The Tsunami 10150-CPE from Proxim Wireless is a compact, IP67 grade robust and cost-effective wireless solution specifically designed for HD video surveillance, perimeter access control and other physical security applications. The compact form factor and high speed mobility technology allow security integrators to deploy low-profile wireless video surveillance wherever needed.

Request more info at www.SecurityInfoWatch.com/12360780

PureTech Systems

Booth #915

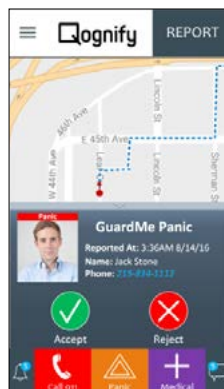

PureTech Systems newest version of its PureActiv geospatial video management and video analytics software adds a deep learning video analytics module, a dashboard for monitoring the health condition of the system and connected peripherals, increased location based intelligence and an improved alarm work flow. It also includes third-party sensor integrations.

Request more info at www.SecurityInfoWatch.com/12361131

Ognify

Booth #1515

What makes smartphones into smart sensors is not just technology, but humans who decide what is worth recording, capturing and sending, and put it in the right context. Ognify Extend mobile apps harness this combination, empowering field personnel to bring information into the control room in the right time and context.

Request more info at www.SecurityInfoWatch.com/12358409

Quantum Corp.

Booth #4170

Quantum Corp.'s StorNext 6 delivers a unique combination of advanced data management features for on-premise, hybrid cloud and public cloud environments and streaming performance, and is now shipping with the company's Xcellis workflow storage solutions. It provides more efficient and cost-effective ways to share and access files across geographically distributed teams.

Request more info at www.SecurityInfoWatch.com/12326583

S2 Security

Booth #3423

S2 Magic Monitor Version 5 unifies access control, video surveillance and forensics, digital signage and live Internet sourced real-time data and information feeds in a single user interface. New features include Dynamic Cells, which allow users to program interactive content, and integration with the NetBox access control and event monitoring system.

Request more info at www.SecurityInfoWatch.com/12360743

Request more info at www.SecurityInfoWatch.com/12360743

Safety Technology Intl. (STI)

Booth #2233

STI's Universal Stopper (STI-13020CB) is an indoor/outdoor polycarbonate cover which offers protection against physical damage (both accidental and intentional), dust and grime, as well as severe environments inside and out. The clear cover protects dual action pull stations, keypads for entry systems, intercom stations, emergency buttons, electrical light switches, duplex plugs and more.

Request more info at www.SecurityInfoWatch.com/10217082

Salto Systems

Booth #3647

SALTO Systems will showcase AElement Fusion, a new electronic lock with a sleek reader accentuated by an interactive light ring that illuminates when access credentials are presented, providing a minimalistic design that blends with any décor. The lock is compatible with RFID, NFC, and BLE (Bluetooth) technologies that integrate seamlessly with mobile applications including Salto's JustIN Mobile.

Request more info at www.SecurityInfoWatch.com/12360271

Securitech

Booth #2224

Auto-Bolt Max is Securitech's newest forced entry-resistant locking system that deadbolts the door at five locking points each time it closes. It features single motion retraction to meet all life safety codes and is built to last with a stainless steel lock body and door trim.

Request more info at www.SecurityInfoWatch.com/12360551

Senstar

Booth #4296

The Senstar LM100 intelligent perimeter lighting and sensing solution combines two key security functions in one - acting a deterrent against intruders, detecting and illuminating them at the fence line while alerting a security management system. It maximizes CCTV performance by using high quality color rendering index (CRI) LED lighting.

Request more info at www.SecurityInfoWatch.com/12361126

Shooter Detection Systems

Booth #1520

Based on military technology, The Guardian Indoor Active Shooter Detection System (SDS) instantly sends gunshot detection and location notifications with no "human in the loop" and zero false alerts. The Guardian System is SAFETY Act Certified by DHS with installations in airports, retail, schools, healthcare facilities and more.

Request more info at www.SecurityInfoWatch.com/12047009

Sielox

Booth #1533

Sielox's AnyWare browser-based Access Control Platform has increased capacity from eight to 40 doors, reads two-factor authentication and has expanded reader and card types to include ANSI Mag/Custom Wiegand, HID Corporate 1000, and PIV, CAC and TWIC. Cardholder Custom Fields allows up to 32 data fields for each cardholder.
